

Member Profile

Qualifications:

- Post Graduate Diploma in Computer Applications (PGDCA)
- Masters in Computer Applications (MCA).
- Perusing research in Computer Sciences.

Born and brought up, in a remote Village Batsargam of elsewhere district Anantang now District Kulgam, Kashmir (UT of Jammu and Kashmir). Due limited resources and lack of exposure I could not follow my dream of becoming an engineer. But was fortunate enough to pursue Diploma and Masters in Computer Applications during the early nineties when computers education was very rare.

Had distinction of being students as well as the employee of the Department of Computer Science and Information Technology University of Jammu since 1993. During the span of almost thirty-one years of technological and administrative experience have handled large number of information technology project and trained lot of Human Resources, who are presently working Globally.

I have been associated with DISHA INDIA since 2005 as active member and having served DISHA INDIA in various capacity like ground level worker, secretary and organizer from time to time. Since 2020 working as the Treasurer for the DISHA INDIA

While working with DISH INDIA at the ground level I have experienced and seen the hardships and suffering of people. At DISHA INDIA we cannot mitigate the suffering of people but at least with our little effort we can ease them a little bit. Trying our best to achieve that limited resources and exposure should not restrain anybody to explore his capabilities and put his/her ideas at work.

Feeling proud to be part of DISHA INDIA.
